

Why Are You Here?

Here are 5 key words that may help you understand the purpose and objective of this office:

INNATE INTELLIGENCE – The term chiropractors use for the life force, energy, or spirit that flows from above, down, inside-out through the brain, down the spinal cord, and out the spinal nerves to give life to every cell in the body.

HEALTH – The condition of being sound in body, mind and spirit, in which all parts of the body and mind function optimally and harmoniously with every other part.

VERTEBRAL SUBLUXATION – A condition of disruption to the nerve impulses of the central nervous system, within the spinal column, causing interference with the expression of innate intelligence. This, in turn, alters the structure and function of the tissues of the body, and is devastating to the health and potential of human beings.

CHIROPRACTOR – An individual trained and dedicated to the location and correction of vertebral subluxations.

ADJUSTMENT – The term given to the force applied to the body, by a chiropractor, with the intent of reducing a vertebral subluxation, to allow the greatest possible expression of innate intelligence to flow freely throughout the body. It's intent is *not* to reduce symptoms or to make someone feel better.
